

Open Access Monographs Information for Authors

Our Open Access Books

Open Access Publishing

Open Access texts are freely available online to read and reuse, helping to make research results and other educational materials available to everyone, globally. This means more readers and greater exposure for your research.

Open Book Publishers

OBP is a non-profit Open Access publisher run by scholars at Cambridge who are committed to making high-quality research freely available to all interested readers.

Our Books

We publish Open Access monographs and textbooks across all disciplines. We currently have over 300 titles on our catalogue, and our online books have been accessed over 4 million times worldwide.

Open Access offers more powerful ways to present your research. Many of our books offer embedded material such as audio, video and supplementary resources. Readers of *Annunciations: Sacred Music for the Twenty-First Century*, for example, can access several original pieces of music composed for the book, both as full scores and embedded in the text as recordings. This musical accompaniment to the written text provides the reader with a deeper insight into the theme of the annunciation in sacred music.

Advantages for Authors

Open Access makes your work available more quickly, to more readers, resulting in much greater exposure for your research. Our books are accessed tens of thousands of times each month by readers all over the world.

At OBP we are passionate about harnessing new technologies to make the best academic research available to all in Open Access formats. We offer authors:

- Reduced time between submission and publication.
- Rigorous and constructive peer-review process.
- Flexibility to include supplementary material online and to update the book after publication.
- Full copyright ownership, a selection of Creative Commons licences and the freedom to re-use their work.
- Tailored editorial and production services.
- Recognition in research appraisals.
- Wide international readership.
- World-wide print and ebook distribution.

Our books are regularly reviewed in top journals and awarded book prizes, and have been submitted to the UK REF assessment exercise. We provide a genuine alternative to legacy publishing without sacrificing quality.

We also collaborate with academic institutions and research centres to create one-off publications or to develop whole series. Our model offers societies and research institutions a flexible and affordable way of publishing, with the opportunity to include online multi-media content. We are currently partnering with organisations such as the University of Cambridge Conservation Research Institute and New York University. Our books include:

A Complete Guide to Maggot Therapy: Clinical Practice, Therapeutic Principles, Production, Distribution, and Ethics

by Frank Stadler (ed.)

Since the revival of maggot therapy in Western wound care approximately thirty years ago, there has been no comprehensive synthesis of what is known about its clinical practice, supply chain management, and social dimensions. This edited volume fills the information vacuum and, importantly, makes the current state of knowledge freely accessible. It is the first to provide sound, evidence-based information and guidance covering the entire supply chain from production to treatment.

A Philosophy of Cover Songs

by P.D. Magnus

Cover songs are a familiar feature of contemporary popular music. Musicians describe their own performances as covers, and audiences use the category to organize their listening and appreciation. However, until now philosophers have not had much to say about them. In *A Philosophy of Cover Songs*, P.D. Magnus demonstrates that philosophy provides a valuable toolbox for thinking about covers; in turn, the philosophy of cover songs illustrates some general points about philosophical method.

'Fragile States' in an Unequal World: The Role of the g7+ in International Diplomacy and Development Cooperation

by Isabel Rocha de Siqueira

This is a book about people. This title introduces the members of the g7+, a group formed by 20 conflict-affected states: why they came to believe in politics and policy; how they feel about their work, their family and their communities; and what they want to leave behind for the next generations. It is the story of their personal and collective values, their mistakes, and the challenges they faced, and it will resonate with anyone who has tried to organize and work with a group of very different people.
