OUR OPEN ACCESS BOOKS

Our Open Access Books

Open Access Publishing

Open Access texts are freely available online to read and reuse, helping to make research results and other educational materials available to everyone, globally. This means more readers and greater exposure for your research.

Open Book Publishers

OBP is a non-profit Open Access publisher run by scholars at Cambridge who are committed to making high-quality research freely available to all interested readers.

Our Books

We publish Open Access monographs and textbooks across all disciplines. We currently have over 450 titles on our catalogue, and our online books have been accessed over 4 million times worldwide.

Open Access offers more powerful ways to present your research. Many of our books offer embedded material such as audio, video and supplementary resources. Readers of *Annunciations: Sacred Music for the Twenty-First Century*, for example, can access several original pieces of music composed for the book, both as full scores and embedded in the text as recordings.
